

16th October 2007

New Passenger Car Registrations
European Union + EFTA Countries

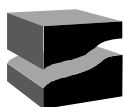

*Not adjusted for working days

New registrations slightly up over three quarters 2007

By the end of the third quarter of 2007, passenger car registrations in Europe (EU27+EFTA) were 0.8% higher than last year. In September, new car registrations slowed down by 1.5% and reached 1,420,043 units. This result has been influenced by one working day less than in the previous year in the whole region. The September decline in Western Europe (-2.1%) contrasted with a sustained upturn in the new EU member states (+9.5%).

In September 2007, German registrations fell by 11% compared to September 2006. Last year's figures were sharply marked by a rush in purchases ahead of increase in VAT announced for January 2007. The Spanish market also downsized considerably (-7.7%) and the situation in Italy remained flat (+0.2%). Registrations in France and the UK were higher than last year (+3.2% and +1.3%, respectively) and half of the remaining EU15 markets also posted growths. The September registrations in most of the new member states were significantly above last year's results, with Lithuania (+39.6%), Bulgaria (+26.9%), Poland (+19.6%) and Romania (+19.5%) accounting for the highest increases.

Cumulative figures over the first nine months of 2007 showed an increase of 0.8% in new passenger car registrations. Falling registrations on three main markets pulled West European figures downwards (-0.2%) whereas the new Member states improved their last year result by 15.5%. Italy (+6.6%) and the UK (+2%) retained their rising trend and France has slowly started to recover (+0.3%). Germany (-8%) and Spain (-2.0%) remained on a slipping path, as did five smaller EU15 countries. Apart from Hungary (-7.1%) all other new member states positively contributed to the overall result.
