

NEW PASSENGER CAR REGISTRATIONS, EUROPEAN UNION¹

PRESS EMBARGO

8.00am CEST (6.00am GMT), 15 October 2021

Passenger car registrations: +6.6% nine months into 2021; -23.1% in September

In September 2021, European Union passenger car registrations continued their decline. Demand in the region shrank by 23.1% to 718,598 units, marking the lowest number of registrations for a month of September since 1995. This decrease in sales was largely caused by a lack of supply of vehicles due to the ongoing semiconductor shortage. Last month's weak performance was replicated at a country level, with all major EU markets recording double-digit declines: Italy (-32.7%), Germany (-25.7%), France (-20.5%) and Spain (-15.7%).

Over the first three quarters of 2021, car registrations across the EU climbed 6.6% to reach 7.5 million units, as significant gains earlier in the year helped to keep cumulative volumes in positive territory. Looking at the largest EU markets, Italy posted the highest increase so far (+20.6%), followed by Spain (+8.8%) and France (+8.0%). By contrast, the German car market slipped back into negative territory (-1.2%).
