

**Invitation to join AERIS for webinars on the air quality modelling study and cost-benefit analysis of potential scenarios for a new pollutant emission regulation**

You are kindly invited to participate in a webinar where AERIS will present the results of the air quality study commissioned by ACEA in two **identical** sessions that will be held on:

- **Wednesday 24 March (14h - 16h CET)** <https://global.gotomeeting.com/join/119858621>
- **Monday 29 March (14h - 16h CET)** <https://global.gotomeeting.com/join/675600989>

The meeting tool is "GoToMeeting", which can be easily used via your internet browser, and the meeting links are shown above. During the webinars questions can be raised by using the chat tool and to raise your hand to speak. To help prepare the webinars please send any specific questions in advance to [amp@acea.be](mailto:amp@acea.be).

The AERIS main report will be published on the ACEA website on the morning of 24 March. We aim that the three more detailed reports on NO<sub>2</sub>, particles and ozone will be published on the ACEA website on the morning of 29 March. At the same time, all data generated by the study will be published and available. The cost-benefit study will be published on the ACEA website in week 15.

You may forward this invitation to any interested party.

I look forward to your participation in the webinars.

Les White

**CEO AERIS EUROPE**
