## SUBSTANCE FACTSHEET

### REACH Regulation (EC) No. 1907/2006, Article 7.2: Notification of Candidate List substances in articles

Substance: 4-heptylphenol, branched and linear  
 CAS Number: Group Entry, See Annex A for list  
 EC Number: Group Entry, See Annex A for list

Inclusion into the REACH Candidate List: January 12, 2017

<b><u>Result of evaluation:</u></b>	Notification recommended	<input type="checkbox"/>
	Notification not considered necessary	<input checked="" type="checkbox"/>

#### DISCLAIMER

*The information contained in this factsheet is intended for guidance only and whilst the information is provided in utmost good faith and has been based on the best information currently available, it is to be relied upon at the user's own risk. No representations or warranties are made with regards to its completeness or accuracy and no liability will be accepted by TF REACH nor any company participating in TF REACH for damages of any nature whatsoever resulting from the use of or reliance on the information.*

*Users are reminded that the text of the REACH Regulation is the only authentic legal reference and that the information in this paper cannot serve as substitute for legal advice and each company must decide the strategy to follow.*

# Evaluation

## Step 1: Investigation tool: TF SVHC Survey List

**Result:** Number of hits in final automotive article:  
HIGH   
LOW   
NONE

---

**Automotive industry articles in which this CL-substance is used:**

---

**Conclusion:** Substance has relevance for the final automotive article?  
YES   
NO

---

**Next step:** Further checks needed:  
YES   
NO

**NOTE:** Even with a low number of hits in the TF SVHC Survey List, a company internal investigation on the tonnage threshold needs to be considered, if the use of the substance is not covered by an already made registration.

## Step 2: Investigation tool: ECHA website “Information on registered substances”

**Result:** Identified uses (menu: Manufacture, Use & Exposure)  
Dossier information #1 (Manufacture, Use & Exposure):  
Industrial uses:  
Updated Dossier information #2 (Manufacture, Use & Exposure):  
Professional uses: not applicable  
Updated Dossier information #3 (Manufacture, Use & Exposure):  
Consumer uses: not applicable  
Uses advised against (menu: Manufacture, Use & Exposure)  
• Dossier information:

---

**Reference material/information** ECHA website:

---

**Conclusion:** Information displayed is not satisfactory and not sufficient, there is no registration dossier, there is no conclusive list of CAS #'s.  
Further checks needed:  
YES   
NO

---

**Next step:** -

### **Step 3: Other investigation sources:**

*Independent from the conclusion in Step 2, it is recommended to always include Step 3 which is considering also other information sources*

**Source:** Lead Registrant   
 Consortia   
 Association / single manufacturer   
 Others : \_\_\_\_\_

**Result:** Identified uses (menu: Manufacture, Use & Exposure)

- Dossier information #1 (Manufacture, Use & Exposure):  
 Professional uses:
  - No additional info
- Updated Dossier information #2  
 Consumers uses:
  - No additional info
- Updated Dossier information #3  
 Industrial uses
  - Used as an intermediate for production of additives for oils. Final product sold to OEM may contain less than 0.1% of substance

**Reference material/information** References:

-

#### **Final non-binding conclusion (step 1-3):**

According to above results a notification is   
**not considered necessary**  
 for the companies in the AI, product is used only  
 as an additive in oils.

According to above results, company   
 internal research on IMDS hits and process chemicals  
 resulting tonnage notification is  
**considered necessary** and may  
 lead to notification for the AI

Working assumptions - Check chapter 5.9 of the Automotive Industry Guideline (AIG V3.1) on [www.acea.be/reach](http://www.acea.be/reach)
